

what?

what?

This lamp takes you right back to the early days when candles had barely been replaced by electrical lights. The beginning of a whole new era. What? is constructed with high quality materials that remind you of those times but they are now linked to modern times by the use of LED technology. The wall plate is cast in bronze with a high polished part in the center. This shiny part sits directly behind the filament LED light bulb and ensures that the light is spread around the room with that familiar good old-fashioned glow.
