COCO

COCO

Coco is well shaped with the least amount of fuss. Her power lies in the translucent material, which is completely illuminated by the built-in LED element. The result: a smooth fixture with a very pleasant light output.

The base of coco is made of translucent corian® (consisting of 70 % mineral raw materials and 25 % of acrylate). By default, the collection is presented in three lengths (120, 160 and 200 cm), but can be produced in various lengths. In addition, the suspension brackets and brass inlay can also be adjusted to color or metal. Coco is a co-creation with designer Wesly Boom.
